Addison County Regional Planning Commission
Transportation Advisory Committee (TAC)
FY 2027 TRANSPORTATION PLANNING
STUDY REQUEST FORM

Do you have a transportation or traffic-related problem affecting your community? The Transportation Advisory Committee (TAC) of the Addison County Regional Planning Commission (ACRPC) is requesting a list of transportation planning studies to fund in Addison County. (Note: these funds **cannot** be used for construction projects.) The TAC will evaluate all requests at their regularly scheduled August meeting. Please be prepared, at the TAC's request, to have a representative make a short presentation at that TAC meeting. Thank you for taking the time to help us develop our priorities for future transportation studies and projects. To apply, please provide the following information. Use extra sheets as necessary.

Projects will be funded through the Transportation Planning Initiative (TPI). ACRPC is preparing to submit its FY 2027 (Oct. 1, 2026 – September 30, 2027) Workplan and Budget. The TPI is designed to foster greater involvement in the transportation planning process by local citizens and officials. Each year, the ACRPC sets aside a portion of the annual TPI funding received to hire consultants to perform various transportation studies in the county on behalf of our member municipalities, a consortium of municipalities, or a regional organization. Grant awards are contingent on ACRPC receiving funding from VTrans.

Please return this Request Form to your TAC delegate or to ACRPC by **Tuesday August 11, 2026**

For questions, additional information, or to submit an application contact:

Examples of transportation planning studies:

Intersection studies
Road realignment studies
Feasibility assessment for sidewalks and bicycle infrastructure
Conceptual design for new infrastructure
Asset management plans
Infrastructure siting assessments

Description of Problem:

The New Haven Selectboard is concerned about the safety of Route 17 (Main St) in the center of town. There is one crosswalk that allows people to cross, however given the site line it is extremely dangerous. This crosswalk is used by pedestrians, many of them school children. Often used by bicyclists too. There have been several near-misses, which we hope to avoid in the future.

Desired Outcomes of Planning Study:

The Town of New Haven is hoping this traffic study will help identify practical and affordable traffic calming measures to ensure the safety of our children, community members as well as visitors.

Expected Benefits of Planning Study/ Next Steps Anticipated:

Once traffic calming measures have been identified, the Selcectboard will prioritize the suggestions after consulting with ACRPC and other agencies. A timeline and budget plan will be developed to determine funding sources; such as grants, to accomplish the work. Where feasible, local funds will be appropriated to accomplish the work.

Amount Requested: 30,000 (Note: We expect to have $50 to 60,000 available and usually fund 2-3 projects)
