Addison County Regional Planning Commission
Transportation Advisory Committee (TAC)
FY 2027 TRANSPORTATION PLANNING
STUDY REQUEST FORM

Do you have a transportation or traffic-related problem affecting your community? The Transportation Advisory Committee (TAC) of the Addison County Regional Planning Commission (ACRPC) is requesting a list of transportation planning studies to fund in Addison County. (Note: these funds **cannot** be used for construction projects.) The TAC will evaluate all requests at their regularly scheduled August meeting. Please be prepared, at the TAC's request, to have a representative make a short presentation at that TAC meeting. Thank you for taking the time to help us develop our priorities for future transportation studies and projects. To apply, please provide the following information. Use extra sheets as necessary.

Projects will be funded through the Transportation Planning Initiative (TPI). ACRPC is preparing to submit its FY 2027 (Oct. 1, 2026 – September 30, 2027) Workplan and Budget. The TPI is designed to foster greater involvement in the transportation planning process by local citizens and officials. Each year, the ACRPC sets aside a portion of the annual TPI funding received to hire consultants to perform various transportation studies in the county on behalf of our member municipalities, a consortium of municipalities, or a regional organization. Grant awards are contingent on ACRPC receiving funding from VTrans.

Please return this Request Form to your TAC delegate or to ACRPC by **Tuesday August 11, 2026**

For questions, additional information, or to submit an application contact:

Examples of transportation planning studies:

Intersection studies
Road realignment studies
Feasibility assessment for sidewalks and bicycle infrastructure
Conceptual design for new infrastructure
Asset management plans
Infrastructure siting assessments

Description of Problem:

The Town of Ferrisburgh does not currently have an accurate up to date inventory of our Paved Roads, Guardrails, and equipment. We also do not have a way to see what year we paved roads, what year we installed guardrails when damage was done to guardrails . The same goes for our equipment all we have is what is on pen and paper filed away.

Desired Outcomes of Planning Study:

I would like to be able to document and track when and where we pave roads, how thick it was, total tons of the Job and overall cost of the project. We do not currently have a guardrail inventory if we had one we could keep track of damage and use that information to use insurance compensation to fix broken guardrails. The same goes for equipment. It would be nice to be able to track the cost of maintenance and overall expense of each piece of equipment to help with budgeting.

Expected Benefits of Planning Study/ Next Steps Anticipated:

Monitor when and how roads are paved. Know the conditions and locations of the guardrails and be able to track individual cost on equipment to see when it is beneficial to replace them.

Amount Requested: $20-30,000 (Note: We expect to have $50 to 60,000 available and usually fund 2-3 projects)
