

# Vernal Pool Modelled Potential Ripton, VT

1:80,000

## Potential Vernal Pools

Highest Potential

Moderate Potential

Low Potential

Potential, Obscured by Conifers

River, Streams and Lakes

Vernal pools were identified using LiDAR, leaf-off orthoimagery and Object-based Image Analysis.

For full methodology, see Faccio, S.D., S.W. MacFaden, J.D. Lambert, J. O'Neil-Dunne, and K.P. McFarland. 2016. The North Atlantic Vernal Pool Data Cooperative: 2016 revision. Final report submitted to the North Atlantic Landscape Conservation Cooperative.
